Object Oriented Programming
Fall 2012
Homework # 9
GUI in Java
Due date Jan 5th 2014 by 23:59

You will design and implement a GUI for the Person and Family classes of HW8. Your system will keep information about families and persons

You will have GUI screens for
- Adding persons and families
- Listing persons and families
- Modifying persons and familes.

Your program should not use any console input output. You may design your GUI as you like but one sample main screen might look like:

Use your GUI to add/ remove/modify persons and familes. Write small report to paste at least 10 screen shots from your program. You may use GUI editors if you like.

Notes:
- You should strictly follow the homework submission details and email your homework to the TA.
